Credo Reference: As Easy to Use as Wikipedia, But Less Likely to Get You Flogged By Profs.*

So, your professor says you can’t use Wikipedia, but you know zilch about stochastic processes and even less about how to relate that to your favorite all-time recording artist, the Velvet Underground (which this author recommends you go out and spend your coffee money on if you haven’t heard of them). AND!: you somehow have to fill up 5 pages on these topics, but you don’t even know where to start.

That’s where our new online reference library, Credo Reference, comes in.

Instead of thumbing through our reference collection (which still has its uses—‘I’m looking at you, English Capstone class!’), you can keyword search the full-texts of dictionaries, encyclopedias, atlases, and subject-specific resources from top publishers. The information you find will be correct, often includes images, sound files, and animation, and will point you in the right direction for future research. In other words, you won’t go on thinking the Velvet Underground is the chic subway in London.

To access Credo Reference, select it from our list of online databases or link to it from many of our research guides. You will not be disappointed -- or punished.

And, the Velvet Underground? They’re in there.

*flogging has typically been frowned upon by the University of West Florida Faculty.

Kindle’in, yo.

Kindle’in (kin lin) v. – 1) Sitting in your bathtub with a Library Amazon Kindle.* 2) Flipping through the virtual pages of a book you requested for a Library Amazon Kindle. Kindle’in (v.) should not be confused with Kindling (n.) - Easily ignited material, such as dry sticks of wood or print books, used to start a fire. Even though, yes, that’s how the Kindle got its name.

*It is recommended that you do not sit in the bathtub with a Library Amazon Kindle unless you wish to pay for said Kindle. So unreliable, the online dictionaries these days.
